(a) Excess of births over deaths. (b) Excess of arrivals over departures. (c) Includes natural increase, net oversea migration and up to June, 1961, adjustments of population on the basis of Census results. (d) Census, 30th June.

POPULATION: STATES

NOTE.—The estimated populations since 30th June, 1961, for each State represent the population ascertained from the results of the Census at that date plus natural increase and recorded net migration into each State. As complete records of interstate migration are not available, the estimated State populations since 30th June, 1961, are approximate and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions, in the past, were substantial.

(a) The figures in this table are based on comprehensive data from the Population Censuses of June, 1954 and June, 1961. Estimates for months subsequent to June, 1961, are derived from current Pay-roll Tax returns, returns of Government employment, other direct records of employment, and estimates of the number of employees not covered by these collections. (b) Includes employees engaged in selling and distribution, etc., as well as those occupied directly in manufacturing activity. (c) Includes Law and Order, Religion and Social Welfare, Health Services, Education and other Community and Business Services. (d) Affected by industrial disputes.

NOTE.—Figures for the period from July, 1962, are being revised and will appear in *Employment and Unemployment*, July, 1964.

VALUE OF RETAIL SALES IN AUSTRALIA(a): COMMODITY GROUPS

(Figures are on a basis comparable with the 1961-62 Retail Census.)

The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the years 1956-57 and 1961-62 are derived from censuses taken in respect of those years, whereas other figures are estimates made by means of sample surveys.

WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

EXPORT PRICE INDEX

The table below sets out Export Price Index numbers on the reference base: Year 1959-60 = 100. This Export Price Index was first published for August, 1962, and has been compiled for each month from July, 1959. It replaced the previous Export Price Index which was published on the reference base: Average of 3 years ended June, 1939 = 100.

A full description of the index and its relationship with the previous index is given in Statistical Bulletin S.B. 134 of 8th October, 1962. Index numbers of the previous Export Price Index, converted to the base: Year 1959-60 = 100 are set out on page 21.

(Base of each Index: Year 1959-60 = 100.)

(a) New indexes on base 1959-60 = 100, replacing previous indexes on base 1955-56 = 100. These indexes are calculated largely by a direct revaluation at base year prices of quantities of goods exported and imported, or where this is impracticable, by dividing values by appropriate price indexes. (b) Excludes gold. (c) Excludes machinery.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(Base of each Index: Average of three years ended June, 1939=100.)

(a) Special purpose index for the "Metals and Coal" group excluding Coal and Briquettes for August, 1964 is 459.

(b) During 1956 these indexes were reconstructed from the base period by excluding potatoes and onions. For August, 1964 index numbers for these groups comparable with the previous indexes including potatoes and onions are: "Foodstuffs and Tobacco" 373, "Goods Principally Home Produced" p395, "Total All Groups" p360. (c) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports.

PRICE INDEXES: VARIOUS COUNTRIES

Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations.

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period. A line between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they are shown on the same base period.

WHOLESALE PRICE INDEXES

SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per £1 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

(a) Weighted averages of minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and agreements. Excludes rural. (b) Awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. (c) Awards or determinations of, or agreements registered with, State industrial tribunals, and certain unregistered agreements. (d) Because of differences in the coverage and the method of weighting, these rates differ from the "Six Capitals" Commonwealth basic wage rates shown on page 29. (e) Margins are minimum amounts, in addition to the basic wage, prescribed in awards, etc., as payable to particular classifications for skill, experience, arduousness and other like factors. (f) Loadings are minimum amounts, in addition to the basic wage and margin (if any), awarded for various kinds of disabilities associated with the performance of work, or to meet particular circumstances. They include payments such as industry loadings and other general loadings prescribed in awards, etc., for the occupations included in the Minimum Wage Rate Index.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory.

NOTE.—Quarterly figures are affected by seasonal influences. Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. However, comparisons of December quarter, 1963 and March and June quarters, 1964 with the corresponding quarters of previous years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

(Base: 1958 = 100)

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period.

(a) See footnote (a) page 50. (b) This series has been compiled from information supplied by the major trading banks as at the second Wednesday of each month. Prior to July, 1962, the series covered all new and increased lending commitments entered into by banks which require the approval of a formal limit on a customer's overdraft account. Commitments in respect of temporary advances to woolbuyers and in respect of term loans were excluded. As from July, 1962, the series has been extended to include new commitments in respect of the term lending arrangements established in mid-April, 1962. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be estimated from this series (after deducting term loan component and adjusting the weekly average to a monthly basis) in conjunction with that of overdraft limits. However, such estimates should be regarded as an approximation only, since there are unavoidable differences in the basis of compilation of the two series. (c) Excludes limits in respect of temporary advances to woolbuyers and term loans.

NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. For this purpose the "investing public" includes banks and life insurance companies (except when subscribing to issues by associated companies) and superannuation funds. The statistics do not include changes in bank overdrafts, loans to authorized dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

(a) Excludes business of the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office, which operate only in New South Wales and Queensland respectively. Monthly averages for the years 1937 to 1947 are based on annual returns for the financial years of the companies. From 1947-48 the figures have been compiled from monthly returns. (b) Relates to periods during which policies were recorded in company registers, which may be subsequent to periods in which written. Recordings tend to concentrate more in the last month of a company's year; months mainly affected are September and December. (c) Includes consideration for annuities. (d) Includes claims paid on death or maturity, payments made on surrender of policies, annuities and bonuses paid in cash. (e) Excludes advances of premiums. (f) Figures for earlier periods not available separately; included with Ordinary Business. (g) Includes superannuation. Separate details of superannuation, which are available for the latter six months of 1961-62, are given below.

(a) *Source:* Reserve Bank. Net Gold and Foreign Exchange Holdings (Official and Banking Institutions). See page 22, Reserve Bank of Australia Statistical Bulletin, Financial Supplement, September, 1960, for a description of this series. Annual and December figures as at end of period, other figures last Wednesday of month. (b) Average of daily quotations. (c) Average of buying and selling rates for telegraphic transfers. (d) Selling rate. Direct quotation. (e) *Source:* Reserve Bank. Yields are to last date of redemption. Income tax rebate of 2s. in the pound has not been taken into account. Prior to July, 1959, rates applied to securities maturing in 2 and 12 years, estimated from rates on securities maturing in 0-5 and 10 or more years, respectively. Figures relate to last Wednesday in month. Since July, 1959, theoretical 2-year and theoretical 15-year securities. Average for the week is centred on last Wednesday of the month. (f) From 1956-57, includes all mortgages for corporations (other than banks and building societies) and individuals, except completely abnormal amounts of £1 m. or more in months in which large mortgages are few in number. Certain other refinements previously incorporated in the series have now been excluded in order to indicate current trends more accurately. Figures prior to 1956-57 have not been adjusted, but the variation between the adjusted and unadjusted series in these earlier years is negligible. (g) Weighted average twelve months. (h) Rural and urban securities. (i) Average rate on mortgages registered in three months ending with month shown.

(a) Figures for N.S.W. represent combined transactions of Consolidated Revenue Fund and Business Undertakings—Railways, Tramways, Omnibuses and Sydney Harbour Trust Section of Maritime Services Board—included in annual Budget Papers. Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
